CONDITIONS AT DALY-WEST.

Over 3,000 Shares Sold from 26 | The Mill Making a Good Saving on 140 Tons of Ore Per Day.

HORN SILVER MILL RUNNING

Work on the Smokehouse Lode Suspended-Inspect the Dexter-The Newhouse Tunnel.

Superintendent John Kirby of the great Daly West at Park City was in town today, having come down last evening with J. J. Brown, whose leg was broken yesterday in the mine. This is the first accident that has occurred in the mine for about a year, and is one which no one can foresee. It seems that
Mr. Brown was picking down loose
ground above the 900 level when the of those accidents, Mr. Kirby says, stage gave way and Mr. Brown was precipitated some 6 or 7 feet below. Though the fall was not great it broke his leg near the ankle, and also put the joint out. The limb of the wounded man was set at the Park and he was conveyed to St. Mary's hospital last evening, where it is thought he will

Speaking of the condition of the bonanza placed in his charge, Mr. Kirby sald it is looking first class. While there have been no striking disclosures since last report, the ore reserves in the up per levels are being added to daily. The mill is also giving a good account of itself, partly because of the fact that the milling ore is of such excellent concentrating quality. About 140 tons of ore is being run through per day, which runs from 8 to 10 per cent lead, with 15 to 20 ounces in allyer per ton. Ninete to 20 ounces in silver per ton. Ninety per cent of the lead values are being saved and from 75 to 80 per cent of the silver contents. The drift on the 1,400 level is being pushed ahead and Mr. Kirby expects big things when the main vein is tapped on that level.

THE SMOKEHOUSE LODE.

Work to be Pushed to the 400 Level

When New Machinery Arrives. Alex Tarbet, the well known mining operator, returned from Butte this morning, after visiting the Smokehouse property in the center of that prosper-ous city, on which work was started several menths ago by the Tarbet syndicate. Work has been shut down for dicare. the present, because of the lack of proper machinery. The 15-horse power electric hoist is not heavy enough to do the work, and the foundation for an 80horse power boiler and engine is now being laid, and will be finished in less than two weeks. The arrival of the machinery and the fact that notices to oult have to be given to some tenants on the ground may, however, cause the shut down to last a month, but not longer. At the end of that time sinking will be pushed to the 400 level. The shaft is now down 210 feet and Mr. Tar bet says the formation is indentical with that found on the 400 level of the Moonlight property about 1,200 feet away. The fact that one of the biggest bodies of copper ore in Butte was exleads Mr. Tarbet to believe that some-thing good will be found on the 400 level of the Smokehouse.

HORN SILVER MILL. It Was the Intention to Start the Wheels Turning Today.

After being delayed several days waiting for machinery parts the man-agement of the Horn Silver is now pre-pared to start up the mill again. It was thought the wheels would turn to-day. This means that 35 men will resume work at once. It takes about that number to operate the mill, which has a capacity of thirty stamps.

RETURN FROM DEXTER.

Directors Return Today and Report the Mine in Good Shape.

Col. S. B. Milner, J. S. Laken and E. O. Lee returned today from an inspec-tion of the Dexter mine. Mr. Milner re-ports the mine in good condition. A station is being cut on the 300 level and drifting will about drifting will shortly commence. The mill is reported to be doing good work, Within a day or two the directors will meet and select a new manager to take the place of R. G. Legg, who lately resigned.

VERY RICH SHIPMENT.

Telluride Ore Sold Which Showed 223 Ounces in Gold Per Ton.

About 500 pounds of high grade tel-unds cre was recently sold in this ty. The ore is said to have been shipped from Colorado in a trunk. The price at which the ore was disposed of is not known, but the assay figures showed 2021 ounces in silver and 223 ounces and a fraction in gold per ton.

NEWHOUSE TUNNEL STRIKE.

Two Strong Views of Ore Now Exposed at Immense Depths.

Perhaps no mioning venture in Colo-Perhaps no mioning venture in gold-rado has ever risen to the present into-portance of the Newhouse tunnel at Idaho Springs. It will be remembered that a few months ago the drills for the first time cut an important ore body, after driving about \$,000 feet into the mountain, says the Denver World. Big mountain, says the Denver work. Its and important as the strike was then reported to be, the general public has but a faint idea of its real value. Try for a moment to realize what it means to open an ore body 38 feet wide 2,306 feet beneath the surface that has an average value of \$30 a ton! The vein cut in this way is traceable on the sur-face thousands of feet, and has already produced millions, and with such data an attempt to put in figures the real value of this great strike staggers the imagination. This single ore body from such a depth will produce more gold than the entire region has yielded from the surface in 40 years of active work.

And now comes the report of still another strike in the new tunnel-500 feet beyond the first great vein, and as far as no wknown of equal importance. It is copper and iron ore, and runs \$10 gold. \$5 sliver. \$6 lead, \$5 copper and no per cent iron. This comes from the footwall, but from the appearance of the drill holes there is a better grade of mineral on the hanging wall. All of that taken out will pay to treat by concentration. The tunnel people are also moving about 30 tons of copper ore

There are mighty things still ahead

an arrown and a second a second and a second a second and this great enterprise, for they are but just entering the region of the great mines of Glipin.

AN IMMENSE OUTPUT. Reported from the Broken Hill Mine

in Australia for the Past Month. The Broken Hill Proprietary company of New South Wales, Australia, reports for the four weeks ending June 20th that the output of the refining works was \$22 ounces fine gold, 426,761 ounces fine silver, 2,829 tons lead, 46 tons hard (antimonial) lead and copper matte estimated to contain 5,927 ounces silver. This makes the total silver

GOLD SEEKERS OF NOME,

432,628 ounces fine.

Their Experiences Will Cause Many

to Feel Satisfied with this Locality. Some people can be fooled most of the time, and others again all the time. Of the latter class a good many are found scattered along the Nome beach today, not knowing where their next meal is to come from. To utter words of warn-ing to them would be useless, says the Denver Post. It has been attempted heretofore without avail, and should they be able to extricate themselves from the unpleasant situation they are in now, the next fantastic boom will find them on the way to a new and possibly equally sad experience of the same sort. That the Rocky Mountain region presents far better chances and without dangers and discomforts surroundcounts spread broadcast by the trans-portation companies of the golden thes of the North and how many have exchanged a good prospect here for etarvation, death and desolation there?

With the energy necessary to make a start in the far-away diggings dis-played here, far better results would be achieved without any of the numerous dangers that sucround the miner and the prospector in a new and sparsely populated country, where everything he has to contend with unaccustomed and harsh climatic influences. After all that has been said and written these many years, warning people to be on their guard against distant allurements, it is somewhat surprising that the Nome esson should have caught as many as it did, especially so soon after the Klon-dike excitement. The magic power of gold in easy reach has again drawn hundreds, perhaps thousands, to an un-timely grave, and the only one benefited by inducing thousands to seek a for-tune on a lonely beach far away from any inhabited point are the transporta-

KLONDIKERS RETURN.

Two Boise Men Able to Clean Up About \$10,000 Each in 2 Years,

Yesterday's Issue of the Boise States. man contains a notice of the return of two successful Klondikers.
W. P. Koelsch and Ed S. Smith left
Boise two years ago last January with

Boise two years ago last January with enough money to get into the Klendike country if they were saving. They return with between \$9,000 and \$10,000 each. They each display handfulls of nuggets, one owned by Mr. Smith being worth \$225. They sold their gold dust at Sentile. F. S. Smith, who was in the Klendike country with his brother and Mr. Money was to Some elsch, went to Nome The three, with one other, owned

claims on Hunker creek, which they worked for two years. In the winter time the frozen, gold-filled ground was dug out and piled on the claim. In the spring it was run through the sluice boxes. During the two years they had three clean ups, the first amounting to \$12,000 the second to \$3,000, and the last, made this spring, to \$20,000, making a total of \$35,000. They sold property for \$16,000 cash, leaving \$51,000, less expenses, to be divided ing the four

Mr. Smith said yesterday he did not Mr. Sinith said yesterday he did not think he would return to the Klondike. He had done a great deal better than hundreds of people who had been at-tracted to the northern gold fields, but we had carned everything he brought way. It was hard work and a very isagreeable country to live in.

MINING NOTES.

The Taylor-Brunton sampler reported 16 cars of ore from Tintic today.

The Mammoth of Tintle reached the market today with 5 cars of ore. Six cars of ore were on the market

today from the Swansea of Tintic.

Five cars of ore from Tintic were re-ported today by the Conklin sampler. M. W. Taylor returned from Arizona yesterday and left for East canyon to-

The Centennial Eureka reached the market today with a 10-car shipment of ure.

J. C. Thompson, the well known broker, is expected home from the East on Saturday.

Managing Director A. F. Holden and James A. Pollock returned last evening from an inspection of the Centennial Eureka at Tintic.

The last car of ore from the Eagle &

Blue Bell was sold on controls showing \$14.20 in gold, 32 ounces silver and six per cent lead per ton.

William P. Hunt Jr., who represents Fairbanks, Morse & Co., of Chicago, is in the city from the East and reports a very great demand for gasoline helsts. The latest assays from the Imperial at Frisco show from 20.4 per cent to 24.4 per cent copper with an average of ounces in silver and \$2.70 in gold per

Col. Traweek expected to leave for Butte this evening on mining business. He will also endeavor to work up an interest in the Elk's Purple Day, Aug. 9th, on which date there will be an excursion from that city to Salt Lake and return for \$15,00.

A four-car lot of ore from the Seven Devils country Idaho, was sold yester-day afternoon to John C. Griffiths, who represents the Chicago copper refinery, Part of the shipment was sold on controls, showing 49.8 per cent copper, while the balance contained 22.6 per cent.

Grand Valley Times: Superintendent Shews, of the Big Indian Copper com-pany came down from the company mines the first of the week. His com-pany is considering the erection of a reduction plant at Big Indian to handie all classes of the ore.

Speaking of the advance in silver the Engineering & Mining Journal says: The rise has been due to an active demand for the metal, the causes for which can be explained with little difficulty and upon the whole it ap-pears probable that the demand for silver will be large for some time to come, and that the metal will command high prices-high, that is, in comparison with those which have been the rule for several years past.
