

deceiving the Commune with regard to the quantity of stores in the ships under his charge.

Additional cable dispatch, Paris, evening, 7.—Firing has ceased and quiet now prevails between the lines, when, apparently by mutual consent, parties are burying the dead and removing the wounded. The Communists admit that the Versailles forces are gaining ground. The latter are pushing between Neuilly and the villages Lavallis and Pewet, with the object of clearing the Seine and driving the nationals to Clichy.

The Republican league sends five delegates to the Congress of Bordeaux. Five priests have been arrested on a charge of being spies of the church.

Judge Ledwith, this morning, adjourned for a week, the proceedings in the Woodhull, Blood & Claflin case.

NEW YORK, 6.—John Orviss, of Boston, presided at the opening of the labor convention, to-day, at the Cooper Institute, at which there was a very slim attendance. Wm. West, a working man of this city, submitted a series of resolutions, calling for a practical organization of the working classes. No vote was taken on the resolutions. Horace A. Dary, of the New England Reform Union, declared that the working men of New England would run a candidate for President and Vice President at the next election.

### FOREIGN.

LONDON, 5.—The *Times'* special says all hopes of peace are abandoned. The Free-masons have gone to the provinces to agitate in favor of the Commune. There was a constant and heavy fire between the forts to-day. Favre, Pouyer and Quertier have gone to Frankfurt to meet Bismarck.

The *Daily News* says the Versailles are shelling Auteuil from the battery at Montrouil. The Prussians allow provisions to enter Paris. Versailles is uneasy. The Castle of Issy is burnt.

The *Telegraph* has a letter which says Russel defends the conduct of Cluseret. The Republican union league demands a twenty days' truce. The railway station at Auteuil is damaged, and the inhabitants are flying. Since Friday the insurgents have lost 2,000 men.

The Communists hold Issy, having entrenched. Issy fires slowly and receives a hail of projectiles; Vanvres the same. The Versailles have unmasked a formidable battery at Montrouil, menacing Auteuil, Point de Jour and Passy. The Versailles have taken St. Germaine and established a battery to shell the gun boats. A naval combat is expected. There is a continuous but resultless bombardment of Montrouge and Haute Bruyere. The Communists occupy trenches at Ville Juif; Ivry replies sharply. A great movement is expected at Neuilly and Lavallois.

It is said Prince Napoleon is here.

PARIS, 5.—The Commune abolishes all political and professional oaths.

The *Official Journal* says Moulin Saquet was surprised by the treachery of the garrison selling the password to the Versailles. The place is recaptured, also Clamart station. The Chateau Issy has been burned by the Federal shells. The *Official Journal* admits serious losses of prisoners and cannon, and admits that the Versailles have advanced and constructed barricades at Neuilly, and that the fire of Valerien has ignited Le Valois and Neuilly. Gen Rossel is wounded in the shoulder.

VERSAILLES, 6.—The statement that the federals occupy Clamart is false.

The journey of Favre and Pouyer is to arrange the difficulties in the Brussels negotiations and hasten the signature to the treaty of peace.

The firing continues; the belligerents are statu quo.

HAVRE, 5.—The Havre and Fecamp Masons have jointly implored the combatants to negotiate.

BUENOS AYRES, April 12.—The yellow fever is dreadful: seven hundred die daily.

VIENNA, 5.—The Arch Duchess Maria Annunziada, daughter of ex-king Ferdinand and the second of Naples and Sicily and the wife of the Arch Duke Charles of Austria died, at her residence here, yesterday.

BERLIN, 5.—Bismarck has gone to Frankfurt to meet Favre who has left Versailles to meet him.

LONDON, 5.—Earl Granville announced, in the House of Lords, to-night, that the government had received official dispatches, confirming the reports of the safety of Dr. Livingston, also giving assurance that his immediate wants had been provided for.

VERSAILLES, evening, 5.—There was considerable firing around Fort Issy to-day, but nothing important was done. All attempts at conciliation are hopeless.

### LOCAL AND OTHER MATTERS.

THE GRADING.—The work of grading for the Utah Southern Railroad goes bravely on. A large number of hands being now engaged on it.

THE UNCLAIMED CATTLE.—All the cattle collected at Jordan bridge at the recent drive, which have not been claimed, are being kept in a good pasture, and parties interested in any of them may learn particulars by applying to Mr. David Hilton, at the General Tithing office, in this city. The horses which were not claimed,—about three hundred head,—have been turned over Jordan on to their old range.

SURGICAL.—Drs. Anderson and Richards, assisted by Dr. Benedict, performed two successful operations, this morning, of lithotomy. The first case was that of a boy named Nixon from St. George, about three and a half years of age; the stone, being extracted by Dr. Richards, and was about the size of a pullet's egg. The second patient was a son of Mr. Van Natti, of the Nineteenth Ward, about eleven years of age. Dr. Anderson performed the operation, taking from him two stones, one measuring fully two inches in length and another of smaller dimensions.

CATERPILLARS.—Caterpillars are making their appearance in many of the orchards in this city, in considerable numbers. Those who have not observed them would do well to examine their trees, for if not discovered and destroyed those pests may destroy a good deal of fruit blossom before the owners of orchards are aware. They generate in a sack composed of a kind of fibrous cob-web substance, from which they emerge, when large enough, and carry on their destructive work.

DAVIS COUNTY FINE STOCK ASSOCIATION.—A week ago to-day we stated, in the NEWS, that stock had been taken in this Association amounting to \$2,773.00. We are informed that during the present week, the amount has been increased to \$4,600.00. Bro. Haight, Superintendent of the Association, returned, the other day from the herd ground and reports everything all right. The stock are rejoicing in an abundance of excellent grass.

ROAD STEAMER.—A short time since John W. Young, Esq., purchased, in the East, and shipped for this city, a road steamer. It is the invention of R. W. Thomson, of Edinburgh, Scotland, and possesses eminent advantages over all other contrivances of the kind. The nominal horse power of the one purchased by Mr. Young, is eight horse, the actual power being, of course, much greater. Its capacity for hauling up inclines of one in twelve, is twelve to seventeen tons, and not exceeding one in thirty, eighteen to thirty tons. It is so constructed that it can be driven over rough and hard roads without damage to the machinery, the wheels being of great width and covered, four inches thick, with vulcanized rubber. This steamer will, doubtless, be very valuable in the hauling of ores from mines, where the inclines on the roads are not too steep. It is easily managed, being capable of turning sharp curves without difficulty. It would also, on account of its great hauling capacity, be very useful in the gravelling or grading of streets. We believe this will be the pioneer road steamer of the West. It will arrive at the depot this evening.

PROFESSOR WALLACE, THE HORSE TAMER.—On Saturday afternoon we attended the exhibition of Professor Wallace, in the General Tithing Office yard, and witnessed his method of training and taming horses. We were highly gratified at what we saw, and are convinced that the Professor thoroughly understands his business. The methods he adopts to render intractable animals docile, and to cure poorly trained horses of vicious and bad habits are simple; and what renders his system still more admirable is the fact that love, combined with an appeal to the animal's intelligence is its foundation. No man, young or old, owning or being at all interested in the management of horses, cannot spend an hour or two better than by learning the system of Professor Wallace. By its aid there is no need to have recourse to the least violence to make the wildest kind of a horse tractable and easily manageable; and it is so simple that it can be easily acquired and applied by any intelligent boy of ten or twelve years of age.

We believe that it is Mr. Wallace's intention to take a tour through the settlements of the Territory for the purpose of imparting his method to all who may desire to acquire it; if he should do so, we assure all that there is no "clap trap" or humbug in the matter, but it is indeed a simple, easy and most effective method of horse training and taming; and worth infinitely more than Mr. Wallace charges for imparting it.

Among the spectators on Saturday were Hon's. John Taylor, J. A. Young, W. G. Young and C. Merkle, Esqs., and a number of others who have had considerable experience in the rearing and management of horses, and all present were unanimous in pronouncing the system one of the best they had ever seen tried. At the close of the exhibition Mr. Joseph A. Young suggested that a resolution expressive of the admiration and satisfaction of the company be presented to Mr. Wallace. On this suggestion Hon. John Taylor presented the following, which was seconded and unanimously carried by the spectators:

Resolved, that this company are highly satisfied with the exhibition of Professor Wallace's method of horse training, and are unanimously of the opinion that his system is eminently satisfactory, so far as they have had an opportunity of witnessing its effects.

### DIED.

In Logan, April 27th, MATHILDA JOSEPHINA THYBERG, of child-birth, aged 26 years and 4 months. She lived the life of a Saint and died with an assurance of a resurrection with the just.—Com. Scandinavian Star please copy.

At Mendon, Cache Co., April 26th, ELISHA KELSEY, son of Charles and Harriet Bird, aged 11 days.

At Hebron, Washington Co., Feb. 9th, 1871, ROZILLA HUFFAKER, wife of John Pulsipher, aged 34 years and 16 days. Deceased was born in Illinois and, with her parents, settled in Salt Lake Valley, in 1847. She was married in 1853 and, with her husband, was among the pioneer settlers of the eastern and southern counties of the Territory.

Also, at the same place, April 24, WILLIAM LEWIS, son of John Pulsipher, and the above deceased, aged 5 years 3 months and 16 days, of measles and dropsy.

Economy in the Kitchen.—Prudent housekeepers are ever on the alert to practice economy in the culinary department. In no way can this be done more effectually than in the use of a Baking Powder which combines purity, strength and reliability. Dooley's Yeast Powder has attained the deserved reputation of being economical, convenient and wholesome, besides which it will produce from a barrel of flour twenty-five to forty pounds more bread, rolls, etc., than by the old process of raising dough with bakers' or hop yeast. Here alone is a great saving, and authorizes the guarantee that it will give entire satisfaction.

If you feel dull, drowsy, debilitated, have frequent headache, mouth tastes bad, poor appetite and tongue coated, you are suffering from Torpid Liver or "Biliousness," and nothing will cure you so speedily and permanently as Dr. Pierce's Alt. Ext. or Golden Medical Discovery. Sold by all druggists.

ESTABLISHED 1850.

### MASSILLON AGRICULTURAL WORKS,

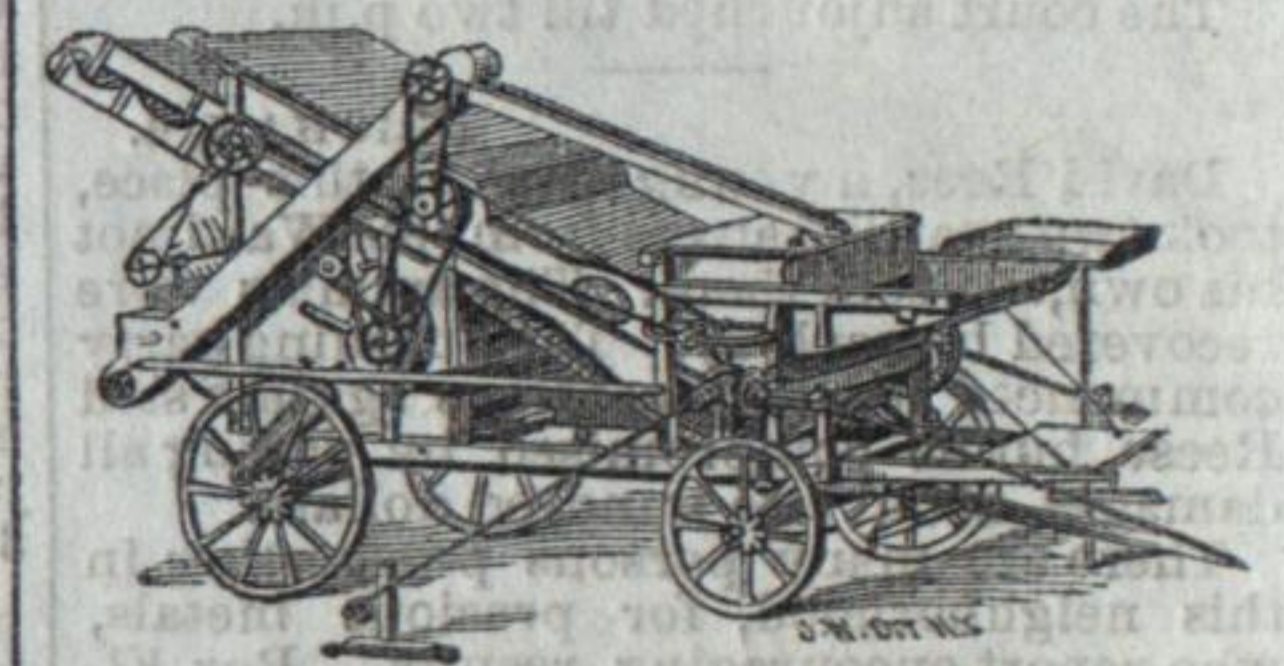

OHIO,

ESTABLISHED.....1842

For the Manufacture of

### RUSSELL & CO'S

IMPROVED

Double-Fan Three-Hitch Gear

### Threshing Machines.

THE success achieved by this machine during the past season is without a parallel.

### Over Eleven Hundred Sold

During the season just closed, all of which have given entire satisfaction. Men that have made a business of threshing for twenty years say that the IMPROVED RUSSELL will thresh and clean more grain of all kinds and do it better, with less power, than any Machine in the country.

### The Three-Hitch Gear and Pivot Cylinder

Has been found not only more convenient and durable than any other arrangement in use, but to run much lighter, and is less liable to get out of order.

### The Adjustable Concave

Has greatly increased its capacity for clean and speedy threshing, and the

### Separating Capacity

Has been vastly improved by the increased width of the Straw Carrier and the extra Reater in the second carrier.

### The Two Fans

Now used in this machine have more than doubled its capacity for cleaning—in fact it is

the only machine that will clean grain fit for market, and do it in such quantities as will justify a man in spending his time in threshing.

### DOUBLE-PINION HORSE-POWER,

With Russell's Patent Movable Center.

Russell's Improved Double Pinion Eight and Ten-Horse Carey Power, with movable center, has long been in use, during which time it has withstood the most severe tests; and for light draft, strength and durability, it has no equal. The movable center, as constructed by us, is of great value, for by its use the master wheel is allowed to adjust itself to the master pinions, so as to divide the labor equally, thus overcoming friction and removing, to a great extent, the liability to break by sudden jerks or starts of the horses.

### Russell's Patent Safety Coupling.

This inclosed safety tumbling-rod coupling is undoubtedly the best ever offered to the public.

### Straw Stacker.

Straw Stackers, single length, sixteen feet, or to fold, twenty feet long, either with or without canvas sides.

### Truck Wagons.

The Truck for hauling the Separator is made of thoroughly seasoned timber and ironed with the best of iron, and suitable for farm purposes.

H. B. CLAWSON, Agent,
