DYNAMITE.

INTERESTING FACTS ABOUT THE GREAT EXPLOSIVE.

Bisnop Frantzen, who had arrived a few days previous from a long absence to the west, was allowed as Counsel-ors, John Pace and John Mathis, who Many people who read about dyn: both had the endorsement from the ite explosions and the occasional whole community and were unaniamage done to property by careless iously sustained by all the Saints. r criminal use of the explosive have Besides organizing the ward, the Apostles spoke to the assembled Saints the idea of the real commercial value. with a power which no man can speak with unless the treasures of heaven ar of the stuff," said a manufacturer, re-cently. "To the public the word dyna tite conjures up pictures of powdered ocks and mangled limbs. To those amiliar with explosives it sayors only courses delivered by those inspired of the Most High, we bid them a hearty t that which is safe and useful. Peole hear at once when a disaster hapble here went to their usual occupacus, but of course there is no reason hey should keep track of the thousands ions with new vigor and energy. Nonof times the stuff is used without dis conceived the idea that another simiaster. Before dynamite was invented gunpowder and rife powder were used in blasting. Fuses were made that would burn away gradually until the charge was reached. When blasts failed to go off, the miner or the quar-ryman often went to the hole in which lar feast was awaiting us, until last evening when, like electric flashes the news spread up and down the river among the Saints that our worthy sister Eliza R. Snow Smith and sister Elizabeth Howard, from Sait Lake yman often went to the hole in which 'ity, and sister Larson and her counie powder was placed to see what was for for the Relief Society of Emery he matter and had his head blown off. Stake, had arrived and that the Saints sometimes the fuse burned so rapidly hat workmen were struck down by were summoned to meet at ten o'clock howers of flying rock before they could Representatives from all the districts each a place of safety. Now that has in the ward made their appearance in our large, commodious meeting house, I been changed. "Dynamite is not fired by a fuse, but where our sisters organized the Pri-

mary Association with Sister Eldredge ith fulminate is placed in the charge as president, whose nomination re-From this cap the wires are run to a make them as performed a place of safety. After the worknen work as possible. have all retired, the foreman connects the wires with a little battery, pulls a respect in a maj ceived a nearty response from the The good presiding sister gave some very valuable instruction for our young ever or presses a button, and off goes he blast. It is no exacgeration to say hat hot one-tenth as many fives are olks, which were wise and timely. Again before two o'clock in the

afternoon, people from all quarters commenced gathering about the meet-ing house. This meeting was for the ost in using dynamite as with the oldashioned powder. In fact, loss of life or damage to property is now invariably ourpose of arranging a Refiel Society ue to criminal carelessness. "The word dynamite covers a half which object was accomplished, with our worthy and esteemed Sister, Sara

ozen different compounds in which 'ox, as president, and Sister Pace nitro glycerine is the explosive. The nitro glycerine is usually mixed with and Sister Empey as her counselors These ladies who have been chosen one other material that furnishes lit and set apart for the offices mentioned le gas when the explosion takes place out there is one high explosive made of have already proven themselves wor-thy of the confidence which the Saintmixture, eight percent of gun cotton, have placed in them, and after meeting and ninety-two per cent of nitrothis afternoon, when congratulations followed, the words, "God bless you, lycerine. This leaves no ash. A more owerful explosive than this combinaister," were heard from all direcion is not made and yet it is singularly

ions. So we feel to thank and bless our safe: visiting bretheren and sisters, and to say, Call again soon. C. II. say, Call again soon.

to improve in the future. I would to Mexico. It is packed in wooden urther say that in consequence of the cases that hold fifty pounds each. They

further say that in consequence of the Bishop, R. H. Stewart and his coun-selors not having been altogether in harmony in the past, it was deemed best that the Bishop's counselors, A. G. Wilson and O. W. Warner, be re-leased and others appointed instead. Accordingly, Counselors Wilson and Warner were honorably released, and G. F. Burnham was ordained and set apart as second counselor. We have head a bountiful harvest this season, which has well paid the hurs-handman for his toil, and makes us feel cheerful and happy. We have need of more help here, and would like a good school teacher, and would like a good school teacher,

and would like a good school teacher, and quarry work, and to those branches miller, wheelwright and shoemaker to of the trade we devote ourselves excome and make permanent homes with clusively =N, Y. Sun.

SPEING AND HEARING.

It is a well known fact that those who are deprived of one of their senses have usually some compensation in a creater acuteness of the others. Th ind will hear sounds that are inaudiole to most people. They have been known to detect the presence and po-sition of the smallest saping on the

oartside, simply by the echo of their ootsteps. The deaf mute, on the othr hand learns to see what his friend is

Laura Bridgman's attainments. This superior power, however, is this superior power, however, is chiefly the result of education and long practice. It is rather acquired skill in using the only means at hard for gain-ing needful knowledge than any orig-ma, supremacy in the organ itself. It is strange that with such examples beore us of what can be thus accomlished, and fully recognizing the value of such education to those who are dearived of one or more of the senses men are yet so unimpressed with the need of some similar training for those who are blessed with all of them. With our many complicated systems for de-eloping the mental powers, there is tet no thorough and systematic course aid out for the eye and the ear. Be ause Nature does so much in this direction, lastead of co-operating with her we leave her to do all, and thus sacrifice much of the possible happi-ness and usefulness of life. Yet these are the channels through which the mind must be led, the very means or

which we rely for all instruction, and y electricity. A little copper cap filled indeed, all communication; and would surely seem only rational to make them as perfectly adapted to their

> There is a woelul deficiency in this respect in a majority of people. Not having been trained to observe with care and scrutiny, they only see a small part of what they look at; and as soon as their eves are removed, much of yeu that part lades from their memory. They visit lake, mountain, and forest, and return with only a confused and faint recollection of the treasures a sature upon which they have looked hey meet acquaintances on the street and pass them by unrecognized. The

pass through picture calleries, gaze of the edifices, and witness interesting or being able to describe them to oth-ers. So in hearing; they only half listen. With a preoccupied mind, they gain only an inadequate or garbled idea cenes without taking in their meaning gain only an inadequate or garbled idea of what is said, and a few repetitions THE PUTNAM NAIL.

COST OF RAISING GRAIN WEBER COUNTY FARMER PROVES THAT WHEAT CAN NOT BE RAISED PROFITABLY AT SIXTY CENTS PER

BUSHEL. HARRISVILLE, Weber Co., Utah, Nov. 12th, 1885. Editor Deseret News.

In your issue of Nov. 10,1885, a Kays ville correspondent, writing under date of Nov. 6th, on the all-important

bushel. In reply I will say, that the past two years have been very favorable to dry-farming, but if I mistake not, other years have been equally disastrous. And then again, our friend does not state the value of his place on which he raised his 2,000 bushels of wheat, but judging by dry land yields hereabouts ne must have had 150 acres. Valuing said land at \$25 per acre, would be said land at \$25 per acre, would be \$3,750. Interest on this investment at 1 per cent, per month for two years would amount to \$900, as our friend says it is a rule of his not to raise grain on the same ground two years in suc

Now, Mr. Editor, this is

NO HYPERBOLICAL AMPLIFICATION, for lots of our farmers are paying from

1% to 2 per cent per month, but possi-bly our Kaysville correspondent does not consider his investment worth any-thing. If he wishes, however, to sell his place and rent out the money at one per cent. he could get four returns a year, whereas now he only gets one return in two years. amount to pay the watermaster to keep water in the ditch for him. Now allow me to give A STATEMENT

of costs of my wheat crop:

\$1.25, total.
\$1.50, total.
\$15.00; total.
\$15.00; total.
Cleaning out water diches, ten days.
Watering twice.
Cutting, binding and shocking.
Hailing and stücking, two hands two days with team. 8 0

15 0 12.7 interestat I per cent.....

The total yield was 306 bushels. Toll and feed off... 26 " Remaining.....280 **

I shall be ever so much pleased if our fortunate brother farmer would send me a check to cover my losses, as five acres of the land mentioned was in corn last year and the worms made the corn crop a total failure. I don't think I have over-estimated the value of my land, as the water right cost me \$10 per acre, and 1 made a ditch from the main channel, a dis-

0 25 fold.'

tance of one-and-a-half miles at a cost of \$200. At least, I would not sell

know how to listen to a lectu me curious experiences.
