

DESERET EVENING NEWS.

VOL. VI.

BY TELEGRAPH
SPECIAL TO THE "DESERET NEWS." PER
DISPATCH AND ATLANTIC AND PACI-
FIC TELEGRAPH.

Last Night's Dispatches.

EASTERN.

Indian Troubles.—The Manitoba At-

tales.—The Modocs.

WATSONVILLE, 30.—The War De-

partment to-day issued an order

dispatch confirming the news of the

Muscle Shell Indian fight, and

complimenting Gen. Custer. The

dispatch is significant in throw-

ing out the recent stories of trou-

ble between Gens. Stanley and Cu-

ster.

Persons who have just reached

Washington from the eastern part

of the country decide that the Indian

difficulties there promise to be for-

mitable this fall.

A correspondence with the Brit-

ish minister on the Manitoba pris-

oners has so far progressed as to

warrant the conclusion that they

will be released on bail. Secretary

Fish and Minister Thornton have

had a conference at the former's

residence relative to the matter.

The proper steps will doubtless

be taken next week.

The Secretary of War will return

on Monday, and will then decide

whether or not the Indians

will be hung to the jurisdiction

of the government, and whether

they will order their trial for various

crimes before committed in that

State.

Released on Bail.

CARTERSVILLE, 30.—The singular Bal-

leenger in the recent accident

on the A. & T. R. was yesterday

released by Judge Gary, of the criminal

court, on bail in bonds for \$3,-

000, of Joseph E. Young, Vice

President of the Atlanta Bankers,

and Valentine E. Gandy.

It is probable that the grand jury will

meet to-morrow to investigate the

case of conductor Beane. The

State attorney is willing to have

the trial postponed. A

gentleman here states that, in spite

of his trial, he will stand by

Beane.

Crashed to Death.

HAMILTON, 30.—John H. Osborn and his son

Dickie, were hunting brush when

in the rugged bush the roots of a large tree, which the son

saw was about falling. He called

to his father to get out of the way,

but Osborn ran in the wrong direction, and, after being struck, breaking his neck and crushing his

entire spinal column, besides breaking every bone in his body, as he

was doubled up.

Fatal Railway Accidents.

ST. LOUIS, 31.—As a freight train

on the St. L. & P. railroad was passing

under the bridge last night, the

brakeman, named McCollum, and

another man, named McGinnis,

who were standing on the top of

the cars, were knocked off and both

killed.

A Big Lawsuit.

WASHINGTON, 31.—Wm. McGehee,

well-known in connection with

the litigation against the New

Mine Mining Co., will soon leave

Washington for California, where

he has engaged to file a suit for

damages, against that company, for

quicksilver taken from the mine.

The case will be tried before the

courts of that State.

A. Steele.

WASHINGTON, 30.—The *Daily*

Advertiser, which, it is said, has

the very silly story started here

about the opposition of the black

man's party in this city, is telling

with very disastrous effect on the

campaign in Virginia. In that

State, many of my neighbors

have decided to come all the white voters

against the radical element, claiming

that they were banding toge-

ther with the negroes. Now it is

heralded all over the State that in

the different southern cities the negroes

are organizing to put down the

whites, and the authority of

republican leaders is quoted, and

the most frantic appeals and

wild harangues of the leaders of

Virginia, in their efforts to incite

the negroes to rebellion.

The government has printed a

bill calling into the army, all males

between twenty and thirty-five

years.

It is reported that the insurgents

are again interrupting the

railroad officers and destroying the

mail between Madrid and the north

frontier.

The government has sent twenty

thousand men to the south frontiers,

and the administration, to my

knowledge, has been

successful in its efforts to incite

the negroes to rebellion.

A Fight.

GALION, Ohio, 30.—A right

accident occurred a few miles west

of this place on the A. & W. R.

R. last night. The train coming

from the west ran into a farmer's

wagon, and the black boy has been

killed in the encounter.

The child, a girl, was severely

injured, and the mother

was slightly injured.

We learn that the latter has since died.

The driver was severely injured.

He urged the horses forward with

the whip, with the intention of

crossing the track ahead of the

train. The horses gave a start,

and the boy was powerless to avoid the calamity.

WESTERN.

New Steamship Line.—A large com-

pany

SAN FRANCISCO, 30.—A new

steamship line between this city

and the South Pacific, the Republic

of Venezuela, will shortly be es-

tablished by a company of New York

merchants.

A white and colored sailor, who

died in a fight, a.m., after a hard

struggle, managed to get the white

man down, and proceeded to masti-

cate his ear, cut off his nose, and

severed his tongue.

The North Beach and Mission

Railroad Company have declared

a dividend of one-half per cent,

payable on Monday.

Accidents.

WATSONVILLE, 30.—A man named

Casper Ham, employed by

Brown, Williams & Co., at their

factory, a few miles from the

place, had his leg broken at the

knee, and sustained other injuries

to-day, by the falling of a log,

while engaged at his work.

Yesterdays.
