IN THE CITY.

Under Quarantine.

LAWYERS CLAIM THAT SUM. SPREADING THE DISEASE. REPULSED BY CANADIANS

Looks Like Gross Carelessness on the Part of Some People - Stringent Repressive Measures Suggested.

The prevalence of smallpox in the city has become a matter of concern to the situation. The officers in the health department are doing all they can to keep the disease under control, but in spite of their efforts it continues breaking out in several portions of the city, until there are now thirty-five cases on the records of the health department, and a great number of persons under the surveillance of its officers.

This state of affairs is due, to a great extent, to the carelessness of the people

iffected, and to a criminal disregard to he quarantine laws. One of the health officers reported today that a child un-der quarantine was seen by him play-ing with the neighboring children; and that the mother of the boy had made no

ffort to isolate her family. The "News" is informed, on good authority, that in the family of the boy Thurman Smith, who lives at 433 west Fourth South street, whose case was reported to the health department Thursday and who had nearly recovered from the disease when found there was an older member of the family, a young lady by the name of Tessie Smith, who had attended the High School during the entire time that she ad been affected with the disease having had a very light case. In this, Miss Smith, is said to have been vaccinated. It is also stated that the boy Bowditch, who lives at 425 west Fourth South street, and who was found yesterday nearly re-covered from the smallpox, had been the during the entire time of the run Inquiry at the office of the board of

health this morning threw no furth light upon the matter. The clerk the board, however, stated that it was all the children in the neighborhood. In the case of Tessie Smith, the medical

ishes to tell the greater care on the part of parents in vaching their children. The health department complains that it has not enough officers to copwith the situation, and says that if something is not done at once, the schools and places of public meeting

in the city will probably have to be closed up within a month. In speaking of the situation. State Superintendent McVicker said this morning that in her opinion the only way possible to keep the schools oper

was to appoint physicians to visit the schools and examine all the pupils at stated periods as to their condition, so as to preclude the possibility of a rece of cases like those of Bowditch and Smith.

Another proceeding suggested by the health department is to enlarge the capacity of the isolation hospital. They claim that quarantining at the houses of the patients has proved of no avail.

The status of affairs may be sensed when it is learned that all the officers of the department of health have been week in tooking after and flagging houses where contagious diseases exist, and have been obliged to let their

Certain it is, that unless care is taken, there is likely to be another smallpox sensation, which, like that of nearly a year ago, may be carried out to some extreme of bitterness.

The designs were prepared by Chief Constructor Hichborn, and provide for a single balancer turret of the Hichborn type, on the cen-ter line forward, with an inclined top, and made of sicel nine inches thick. This turret will contain two of the new high power 12-inch breech loading rifes. Besides this armament the Arkansas will carry four 4-inch quick fire guns,

three 6-pounders and four 1-pounder.
A special effort was made to secure vessel, so the Arkansas, when complete, will draw only if feet, f inches of water on a displacement of 3.235 tons, enabling her to slip into any harbor open to sea going shipping. Eleven inches of steel armor protect the sides of the monitor above the water lines, and there will be a protective deck for the full length of the vessel 1/2 inches thick. Twin screw engines will drive the monitor at a max. imum speed of 11 knots, amply suf-ficient for a harbor defense vessel and turning gears, ammunition hoist, ventil ating apparatus and all the secondary accommodations. The wood in the ves-sel is fire proof. Unlike the old type of monitors the Arkansas will have state rooms above the dock for the officers and crew, but the superstructure has been so designed that it will not effect the ship should the superstruc-ture be destroyed in action, thus retain. ing the virtue of the monitor principle.
