JETER CLINTON, Justice of the Peace.

This afternoon, at 2 o'clock, the Baker perjury case was resumed before Justice linton. The counsel for the accused submitted a motion, without argument, for the discharge of the prisoner, because the allidavit on which he was arrested failed to state that he had testified falsely on any ma-

terial paint.

Mr. High, Deputy U. S. Attorney, read portions of the affidavit which, he said, were sufficient without argument, to refute the grounds on which the above motion

The motion was over-ruled.

Defendant's counsel waived any examination, and requested the court to fix the amount of bail. Mr. High suggested in view of the grave nature of the charge, that the bail be fixed at \$5,000. The court thought that exorbitant ball should not be required in any case, and fixed the amount ired in any case, and fixed the amount at \$3,000.

Detendant's counsel said they were not prepared to give bail, and he saked that a miximus be issued and the prisoner be

turned over to the U. S. Marshal, to await the action of the Grand Jury on the 20th

It will be seen by this table that the popularity of the Stager Machine far exceeds that of all others, their sale being one-half greater than even that of the famous "Wheeler & Wilson" machine. This is owing to the fact that the Stager Company have lately commenced making, besides their old and well-established manufacturing machine, what is known as their "New Family Machine," which is selling at the rate of mine to one better than their old style." Our Machines are the Best in the World! The New Family Singer Sewing Machine With Attachments for All Kinds of Work,

s fast winning supreme favor in the household, as shown by the rapidly increasing sales, over all other machines.

This New Family Machine is now capable of a range and variety of work such as was early recently thought impossible to perform by machinery. We claim and can show that it is the cheapent, most beautiful, delicately arranged, nicely adjusted, easily operated, speedy and smoothly running of all the Family Sewing Machines. It is remarkable not only for the range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist, linen or cotton thread, fine or coarse, making the interlocked-classic-sitted, alike on both sides of the fabric sewe: the only stitch which is universally approved, or is at all adapted to first-class work. Thus, beaver cloth, or leather may be sewn with great strength and uniformity of stitch, and, in a moment this willing and never-wearying instrument may be adjusted for fine stitch, and, in a moment this willing and never-wearying instrument may be adjusted for fine work on some or consumer than or the tucking of taristan, or ruffling, or almost any other work on gause or gossamer tissue, or the tucking of tartatan, or ruffling, or almost any other work—even by a child—which delicate fingers have been known to perform. Even the care-less and thoughtless have little or no trouble on this machine.
