

# TELEGRAPHIC. MEDICAL CONGRESS.

Joint Resolutions Adopted  
by the Delegates.

PROSECUTION IN THE COURTS OF LAW

General Agglos Capital Punishment  
as a Rule of Judicial Barbarism—  
Brought and Received.

New York, Sept. 6.—The third day of the medical congress began with the reading by Clark Hall of a paper by George Brown, on the history of Capital Punishment. The author maintained that the death penalty has no deterrent effect; that it was a rule of judicial barbarism, and was entirely out of place in the law.

Chambers was then received, and Professor C. A. Dornan read a paper on The Criminal Class of Chronic Arterial Pathology. Professor H. M. Agnew read a paper on the National Association.

The afternoon session was opened with the reading of a paper by Clark Hall on the history of the Congress of Law. Mr. Hall's letter in several points physician's selling, can cause the public to buy, or can prevent the public from buying, the article.

"As you know, the Republicans are not together. They are afraid of the silver issue, and are doing all they can to keep it quiet. The only thing the free coiners can do now is to keep quiet. If they stand up to another hard issue longer, it will have a great effect. It was the issue of the last \$100,000,000 that set the people to thinking. The Western people know this, and they will try to prevent another one of these."

"Is it a compromise position?"

"They tried it in Kentucky. They put up their silver candidate there on the strength of the silver. When the result came, they are in a worse shape than they were before the convention."

Indicates going to the operating room. Officials based on the procedure, and the bicycle mandate was quietly issued.

**Waterson Retires from Politics.**

SALT LAKE CITY, Sept. 6.—The University of Colorado is an interesting place to study the political parties. Under no circumstances, he said, would we have any further politics, speeches, and he further stated that it is his intention to leave Europe next year to again participate in the national debate.

**Division of the Silver Tax.**

KANSAS CITY, Mo., Sept. 6.—The Congressional Bank was here today. It was said: "In case the Democratic party continues its present course, it will be a prominent new platform, what will be the result?"

"There will be a division between Eastern and Western democracy. It seems to me inevitable that on the part of the other party, the party leaders are one way and the party is the other. Waterson, the tall and other things have kept the party together here, but they are having a fight. No one can tell the result."

"As you know, the Republicans are not together. They are afraid of the silver issue, and are doing all they can to keep it quiet. The only thing the free coiners can do now is to keep quiet. If they stand up to another hard issue longer, it will have a great effect. It was the issue of the last \$100,000,000 that set the people to thinking. The Western people know this, and they will try to prevent another one of these."

**BRASCH LAMENT IN DEATH.**

**Dr. Buch Present in the Success Trial.**

NEW YORK, Sept. 6.—This trial of Brasch in the trial of Dr. Dornan is proceeding slowly. During the past week, the defense has been on trial and all that has been established is that Brasch is dead and that his body bears marks of violence.

The prosecution is inclined to make a special effort to get the necessary evidence. On the other hand, the defense seems to be threading dangerous paths and, seeking for technicalities in the presentation of witnesses, is giving the jury time to consider the question.

It is now said that the defense will rely largely on the improbability of the prosecution proving its case beyond a reasonable doubt.

Witnesses in the trial were instructed by the prosecution to complete the evidence that Brasch's death was natural.

Polden, who accompanied Brasch to the United States, was examined yesterday. He identified the body as that of Brasch and the clothing as that of the doctor had. The jeweler who had the ring in his possession. The doctor commented that the man's brain was very bad, but that he had a strong heart. It was agreed to get the subject back to a medical state before he reached the prison.

Dr. Carl Schaefer, of Chicago, wrote to say that a medical criminal could be made to commit acts under his influence, but not a person of real value.

W. H. Howard, of Baltimore, and his colleague was ready. He gave several instances of hypnotized persons in hospitals, including himself, whom he said to a neighbor, "I am not a criminal, but I am a good man." The jeweler who had the ring in his possession. The doctor commented that the man's brain was very bad, but that he had a strong heart. It was agreed to get the subject back to a medical state before he reached the prison.

In Boston, Mass., both a physician and a lawyer who was a member of the bar were cured of hypnosis.

The following resolution was adopted:

"Resolved, That it is the duty and would be in the interest and benefit of the legal and medical professions if every national and state medical society and every state medical association in the United States and its territories should appoint a standing committee on medical jurisprudence."

On motion of Dr. H. Hansen the following was passed:

"Resolved, That it is the duty and

would be in the interest and benefit of the legal and medical professions if every national and state medical society and every state medical association in the United States and its territories should appoint a standing committee on medical jurisprudence."

On motion of Dr. H. Hansen the following was passed:

"Resolved, That it is the duty and

would be in the interest and benefit of the legal and medical professions if every national and state medical society and every state medical association in the United States and its territories should appoint a standing committee on medical jurisprudence."

On motion of Dr. H. Hansen the following was passed:

"Resolved, That it is the duty and
