COEUR D'ALENE JUNKET. Idaho Legislators Will Probably Take a Trip Themselves.

[SPECIAL TO THE "NEWS."] Boise, Ida., Feb. 21 .- A resolution passed the House today prohibiting the presentation of new bills after Monday. Representatives Hunt, Ingling, Jensen, of Bannock county, co-operating with the members from other southeastern Idaho counties are making arrangements for a legislative party to go to the Coeur d'Alenes immediately after adjournment. In speaking of the trip Mr. Hunt said: "The people of the southeast are in the dark relative to the true status, and a more infimate acquaintance with the people of the north would have a tendency to unite and solidify the spirit of friendship that should and ought to exist. The people of the southeast want to know whether the trouble lies in the Coeur d'Alene country. The only way we can tell of this is by personal observation."

He also had some letters on him to be deterinined.

It is still uncertain whether Mr. Con ger's message marks the passage of this important phase of the Chinese question relative to punishments and the taking up of the questions of indemnity and guarantees. All depends upon whether the foreign ministers at Pekin have determined that the sentences above described must be executed as a preliminary to further progress in the negotiations. It is surmised here that such is the case, though it is regarded as an unnecessary delay in the negotiations, which it is apparent to the official mind, must consume many weeks before the single question of indemnities can be cleared away. Apprehension on this score is based upon reports,

unofficial but credible, indicating Some of the doctors gave it as their purpose of the Germans to claim indem-nities, which both in amount and in the from polyon, and Dr. Beatty was of the opinion that smallpox was the cause of method of payment would be far be-

EXPEDITION WILL NOT TART.

Paris, Feb. 21,-The contere of the Associated Press has excellent authority for the statement that Field Marshal Count von Waldersee's expedition will not start as it is be-lleved a decree will be published in Pekin today accepting the terms de-manded by the ministers. The expedi-tion therefore will not be necessary.

Should the above information prove untrue, it can be said upon the same authority, it is most certain France and Russia will not participate in any punitive expedition, as those nations have consistently, with the United States, opposed any military reprisals beyond those necessary to relieve the legations. The correspondent of the Associated Press is informed that the French minister of foreign affairs, M. Delcasse, is strongly opposed to the proposed military expedition.

SENATOR THOMAS SPEAKS

The Chamber Crowded This After-

After having their pictures taken this afternoon the senators convened to consider two questions that are before them, one of them being the McMillan anti-compulsory vaccination bill. The latter was taken up first. The public

interest that is centered in the outcome of the bill was attested by the large company of spectators that took up nearly all of the available room in the chamber. Before the vote was taken on the bill Senator Thomas secured the floor, saying that he thought a few reasons should be stated why the bill should be passed notwithstanding the disapproval of the governor. He reviewed the situation in regard to smallpox and vaccination, until it cuiminated in the introduction of the McMillan bill. Senator Thomas aimed a few shots at the Governor who he says calls the will of the "cople "public clamor." The bill in question had been vetoed by the chief executive, and passed over his head in the lower house. The Legislature had been memorialized by the citizens of the State to pass the bill. Senator Thomas went on to read statistics tending to prove that the majority of the really scientific world was

opposed to vaccination. But the point that he wished to raise most strongly was the question of personal rights. He read a report of the action of the people of Boston who resisted compulsory vac-cination on the question of personal rights, contending that it would be just as consistent to oblige the people to take a certain brand of pills. To Revolutionize Boiler Making.

New Haven, Conn., Feb. 21.-Having invented a fire box for locomotives which is proving a great success, Connellus Vanderbilt is now at work on a new form of boiler, a multitubular, which promises, he says, to work a revolution in boller making and construction.

"My inventions have just begun," he said to an audience of students and professors from the Sheffleid Scientific "I am now working on a multi tubular boller. I regard the possibili-ties of this as very great. Within a few years it will be in general use, Within a year I hope to appear before you and give a practical demonstration of its resultilities and of my these of of its possibilities and of my ideas on the subject.

'It apears to me very remarkable," he added, "that so few improvements have been made in the patterns of boilers since the days of Stephenson. There is plenty of room for more change in the construction, and many changes are likely to be made in the next few days." Mr. Vanderbilt spoke under the aus pices of the Sngineers' club. Practical men who heard him say his ideas are sound. They expect great things of him as an inventor.

WALDERSEE'S PLAN IN DISFAVOR

Berlin, Feb. 21 .- The expeditionary plan of Field Marshal Count von Wal-dersee continues in disfavor with the larger part of the German press. The Vorwaerts today says that if the German government, in view of the latest satisfactory telegrams received from Sian Fu, should not declare its intention to abandon the proposed expeditions, the representatives of the nation will force an opportunity in the reichstag to energetically protest against such plans, which might lead to the gravest inter-national entanglements and indefinitely prolong the war in China. The reich-stag, says the Vorwaerts, cannot be ignored by the government now as it was in the summer of 1900.
