DEATH LURKS IN SICK KIDNEYS

The kidneys are the weak link in the chain of life, and are daily carrying thousands of victims to untimely graves. Ninety men and women in every hundred have kidney troubles and don't konw it, because it's only when the trouble reaches an advanced stage that it's recognized as kidney disease.

We imagine we have dyspepsia, heart we imagine we have dyspepsia, heart disease, nervous prostration and a hundred and one ills, but nine times out of ten the real trouble is that the kidneys are so weak and diseased that they are utterly unable to carry the waste matters out of the bly, and the uric acid accumulates in the system, and slowly but surely paves the way for Bright's disease, diabetes, blood poisoning and a horrible death in convulsions, Ask your doctor if this is not good, solid, common sense.
