UR MINERAL EXHIBIT.

Keeping Stock Brokers Arranging for Its Perpetuation.

WILL BE PRESENTED TO THE STATE.

Utahns Visit the Only Seller on the Exchange—Some Parks Gold Dust—Dividends Paid Today.

If coal stock brokers have their way about it some considerable certain that the mineral exhibit of Utah will perhaps be the nucleus around which will be built a magnificent mineral exhibition and arrangement in the permanent line and means for the exhibit, and there is a feeling among the boards of all interested in the matter that the splendid showing of minerals, covering as it does many and many districts of importance in Utah, should be preserved as a monument, if you please, to the State's possibilities as a mining

It is proposed by those subscribing to the exhibit, to present the same to the State, that it might be kept intact, and to this end a movement is on foot to get a movement as a permanent place for the exhibit at some time in the future. In order the more the stock brokers are able to show themselves to ask to care for it, and should this be found then they—the Salt Lake and mineral Exchanges—will be able to handle it in a more commodious manner than is now the case. It is proposed to have the exhibit on hand at the opening of the legislature, when it will be exhibited in a room in the capitol building, where it will remain for a number of days, and the matter was considered by the mining exchange board this morning, and Messrs. Tibbals, Steele and Bell were appointed a committee to wait after the closing of a room now occupied by the mining exchange in Walker Bank building, east of and around south street. It is large enough for the purpose, and the necessary arrangements can be made to suit the needs. The committee will report back and be made a fit place for the exhibit and attempt to assemble in the room. Work will be commenced on and the place will be a headquarters and information bureau for strangers. Mining and coal companies may be looked into and investigated by men desiring information with a view to investment. The plan is carried out to proposed and will be that much ahead.

SALES OF CHLORIDE POINT.

Men Were All Over Saved the Exchange from a Whitewash.

At Chloride Point, Prof. Tibbals and a number of mining brokers from Salt Lake were present to witness the auction sales of mining properties from an out-and-out which the morning. Besides the quite array of stocks the brokers had to select from, not a single share changed hands until Chloride Point reached, and did any record transact on this was disposed of. The sales, which numbered some four hundred, was a phenomenon, a problem, etc., etc., but it opened up the eyes of many brokers to the fact that there is a market for mining stocks in Utah, and the sales at the close, 365, was the best day's business ever done by the exchange, with the exception of the sales on the 4th of July, 1897, when the Crescent Mining and Smelting company's stock was sold on the floor of the exchange. The mining stocks sold were all from the Chloride Point district, and the Crescent Mining and Smelting company's stock, which is now said to be the best property in the district. The Crescent is about ready to do the right thing by the holders of the stock, and it is generally believed that it is very shortly to declare a dividend. A successful run will be inaugurated at the mines and it is believed that it will prove some of the best dividend and other mines in that district. The sales of the day will undoubtedly be materially to push up the market for mining stocks in the future. At the call, it can be said that in the main it was gratifying. Good figures, most of the stocks selling at or above the figures at which they were last marked on the boards. The better stocks were all in demand, as figures show, and Rabbit Hole, Centennial-Eureka, Bayer-Mattison, Grand Central, Mammoth Mill and Mammoth Mining and Smelting were offered in considerable lots, along with Deseret Mining and Smelting, Mammoth Mill and Mammoth Mining and Smelting, which were offered in considerable lots at Tuesday's sales. The closing figures were as follows:

RICH HAUL GOLD DUST.

Some Men Keeping a Harvest from Their Labors in That Section.

[illegible] Many men down from Placerville [illegible] a big clean-up [illegible] of bullion, says the Boise [illegible] Statesman. Considering the scarcity [illegible] the season has been [illegible] from the placer mines [illegible] Leary has owned all the water [illegible] and [illegible] both wash and vast [illegible] that of Illinois gulch [illegible] Miles. He is interested in [illegible] the Ranch company diggings, the Placerville and other immediate claims [illegible] to about 1,000 [illegible].

Mr. Leary usually employs from 25 to 35 men every season, but owing to the scarcity of water this year a less number was employed than usual. Only one claim was worked. The Placerville claim was also worked on account of scarcity of water.

The Full creek fruit property owned by Thomas Kennedy, Hollister Orchard and James McGarry has yielded more gold in proportion to the water supply than in any previous year. The company own three ditches, taking water out of Full creek. Quartz creek and Full creek, and controls from 200 to 400 acres of land.

John Hawley and son and Frank Johnson own extensive properties and are doing well.

Harry Ashcroft and son have claims on Wolf creek that are paying well. Henry Bredt is working the Christmas claims on Ore Creek. Tom Daley has a fine property near Granite creek.

Mitchell Bros., James Tate and James Daly are operating Quartz creek flat and are using over 1,000 inches of water.

Two Dividends Paid Today.

The Grand Central made a distribution of $12,000 today, the same representing its July dividend, which gives the company a total of $42,500. The Mammoth, which was also expected to pay out today, did not, the company sending out dividend checks to the tune of $10,000. The reason for the Mammoth not reporting to post one in a day or two, has decided to pass this month's, but it is understood that the Deseret-Morrison will shortly declare one.

Meteor Viewed by a Visitor.

Carl J. Hahn, cashier of the State bank at Hooper, Neb., returned last night from a few days' sojourn in Montana, where he went to look over the mines. Mr. Hahn was much pleased with what he saw in Utah's good camps, and says the Hooper-Mattison are both capable of shipping and looking very well. Mr. Hahn also visited the Ohio Gold Mines through the big mill. Its ores graders are now at work preparing for the entertainment, and that the camp in general looks healthy and vigorous.

Dips and Spurts.

Silver 58½, bid $2.60.

Hon. F. A. Hammond was an interested visitor on the stock exchange this morning.

G. G. Laferre of Montreal, and C. H. Thompson of Spokane, have abandoned the Victor mine near Baker City, Or., and intend to resume operations.

Mammoth Record: The Lower Mammoth dropped a car load of fine boring ore this week. Harry Joseph came ashore last Friday for the purpose of looking over the property and reports it in a splendid condition.

The meeting board of the stock exchange has decided that hereafter on stocks selling above 25c a share, 25 shares shall constitute a board lot. This ruling was made in order that lots could be formed on small blocks of Commercial-Eureka.

The mining industry is said to be booming on Snake river. The Hammond dredge made a run that demonstrated that they can handle 2,000 yards of gravel per day, while the English company is running and getting satisfactory results. A New York company has intended machinery at Arcadia and will put in a plant on what is known as the Williams ground.

HORRIBLY MANGLED.

J. C. Fullmer, a Miner, Killed by an Explosion at Tintic.

Mammoth Record: J. C. Fullmer was found dead at the North Star mine by the 11 o'clock shift when they went on duty last night. From all evidence obtainable it is thought that Fullmer ran into a blind hole, as he was badly mangled, his right arm being blown off and the right leg mostly hanging by a shred, the collar bone was broken, the skull crushed, and the ribs smashed in.

This was the second shot the deceased had put in and it is now that he had made preparations to leave the mine, as his tools were all packed up. He is all probability went to the second hole and stooping down pulled on the fuse when the explosion took place which launched him into eternity. An inquest was held and a verdict rendered in accordance with the evidence. Deceased was 36 years of age, single and leaves aged parents to mourn his loss. The remains will be shipped to his old home for interment.

Isaac Edinborough Dead.

North Republic: Word has been received at Mercur that Uncle Isaac Edinborough had died in England from pneumonia and diabetes. The deceased was paying a visit to relatives and friends.

Brakeman Loses a Foot.

Mammoth Record: James Mickelson, a brakeman on the Sou. Pac. Tintic railroad, met with an accident which came near resulting in him losing his life. He was descending from a car loaded with mining machinery when he had slipped and he was thrown under the wheels and his left foot was badly smashed. The accident took place in front of the old Tuscalar at 5:30 p. m. The injured man was taken to St. Mark's hospital, Salt Lake, where Drs. Dawson and Mitchell amputated the injured member.

Council Committees Meet.

The Council committees met last night, but transacted very little business. The proposed $5 license on all telephones was talked over by the municipal laws committee but, owing to the absence of Councilman Calister, action was deferred for one week.

The waterworks committee will recommend to the Council the removal of light candles from the stone house on North Temple street to the city and county building. This will mean the saving of the salary of a watchperson.

The street committee decided to recommend the granting of the petition of O. J. Salisbury and others, who asked that Fifth East street from Ninth to South streets be leveled and sprinkled for traveling purposes.

The program committee on Pioneer square park dedication met for a short while, but will meet again after Pioneer Council meeting and perfect arrangements for the celebration.

CELEBRATED LAST NIGHT.

Salt Lake People Showed Appreciation of Shaffer's Strategy.

The Tabernacle choir, Held's band, the Ellis Rice club and a few, other patriotic, jolly crowd felt so tear sight and celebrated the fall of Santiago. My! How they yelled! And they found it difficult to stop. The thing was kept up until late in the night, and even then some of them didn't go home. In fact, it would be appropriate to say that some of them haven't went yet. The fun last night was longer than that of the afternoon, and if the boys in blue at Santiago could have seen and heard it all they would have no hesitation about shaking all the dynamite. Our men were there, with yellow fever thrown in. It was a great night.

The Royal is the highest grade baking powder known. Actual tests show it goes one-third further than any other brand.

ON ST. MARY'S RIVER

Big Colonization Enterprise on Foot in the Northwest Territories.

AN OPPORTUNITY FOR HOME SEEKERS.

Alberta, on the Line of a Railroad Soon to be Built—Big Canal Will be Constructed.

There is a splendid colonization movement on foot in the Northwest territories. It is known as the Alberta colony and is situated on St. Mary's river, south of the Blackfoot Indian reservation, which lies in the southwestern part of Montana.

The country being a new one it offers fine opportunities to homeseekers and those willing to develop their farms along with the growth of a new locality. The land is good and rapidly becoming settled and those who go in the front of proper effects will be the owners of those after the second boom comes. Many Utah people are going to settle in the locality, and some have the assurance of a send from a point on the St. Mary's river, to the effect that 100 families will be in the locality before the end of the month. The committee will be able to be ready to receive applications at the depot, and will be glad to give information as to the selection of lands. Those who purchase from the time of buying the land will be paid on—full cash and the other half will go to the payment for the land they buy. It is a country where all of needs are in proportion to the wealth of work they do on the land. The circumstances is a splendid one for the reason that while the settler is paying for his land is laid to will receive a sufficient amount of cash to carry him along and with which to purchase and build a home, etc. While he is engaged in the work on the canal will be paid for on the basis of ten cents per cubic yard, with extra allowance for rock. He will be given and under the supervision of H. O. Call, C. E., who will actively the letting of contracts.

The locality of the colony is on the line of a prospective railroad, of the building of which the people are sanguine that negotiations will be completed in a few months. Work on the canal will begin in September next and is to be finished on or before December 31, 1899. For any further information in regard to the matter call on or address Mr. Call, Salt Lake City, Utah, who will furnish all information desired.

Townsite Sold.

The Twentieth ward townsite will be sold next Sunday evening. Twenty-sixth ward will follow next week.

Sea Lieutenant Aged.

"Tom" Smith, the Grand Army veteran, has been appointed executive agent for Lieut. Gen. Frank Wheaton, who is now leading for the front.
