Friday, December 21, 1888. FALSEHOOD AS A FINE ART A FEW days since we published an ar ticle bearing upon the progressive prospects of this city. It was clearly shown that the advertising efforts of real estate dealers regarding the resources of the Territory would prove a block to development. The reason for

misled and in a manuer swindled by their misrepresentations. If any evidence were wanting here of

mon" paper published in this city. The views therein expressed are about as dishonest and objectionable as they well could be. The parties entertaining or enunciating them have not the slightest claim to honor or truth. The position taken in the article is

to the effect that if an epidemic were raging here, strangers should be kept in ignorance of that fact so long as nothing was said in the newspapers they brought money. No matter though they might be selzed with the contagion of disease and carried to the grave | vent reference to it by the press, for by the hundred, let the boom business. be prosecuted. To carry out this infamous, swindling and inhuman theory classes of men are to be trained to become un mitigated liars general principles. If such a pro- ity continued to spread, and a few ject be carried out - it has days ago it burst out in a manner been already in part-characters who which attracted wide attention. One entertain and advocate such deceptive of the Baptist congregations divided ideas are fitted by nature and instinct on the question, twenty-two members, to be at the head of a regularly organized association of prevaricators.

The article now referred to is one of the hardest knocks ever delivered at a separate body. the sewerage scheme for this city. The system established in Denver is said to be a failure, but the boomers have covered up this fact. If the system inaugurated in Denver is a failure, that proposed for Salt Lake would also prove a fizzle. Worse than that, it would be an unqualified disaster. The natural facilities for sewerage in Denver and vicinity are incomparably better than those of this city and neighborhood. The same engineer who drew the plans for Denver has furnished them for Salt Lake. If he could not make a success, with comparatively superior advantages in the former city, how could be do otherwise than fail in this city with greater natural d fficulties to encounter?

The suggestion that the local news-

papers join in this wholesale scheme of villaineus duplicity and falsehood defined in the reproduced article which appears in this issue, is in keeping with the balance of the scheme. It is a matter of regret that the press has, to some extent, lent itself in that direction already. And in the publication of the article we repreduce, the paper from which it was taken indulges in the peculiar pastime of cuffing its own ears.

THE FALL OF SUAKIN.

Asia and Africa. It is about midway in which it is spreading among rebetween the northern and southern ligious denominations, its prevalence extremities of the Sea, which is about is another proof of the influence ex-1200 miles long and 150 miles average erted upon modern religious thought width; is about 5250 miles from Eng | and faith by the great Prophet of the land by water, and 2360 miles from present century. the nearest point in India. It has a fine harbor, and being flanked by high mountains is capable of being made a strongly fortified point. It might be called one of the somewnat numerous "keys" of the chief waterway connecting the Atiantic and Indian oceans through the man-made link of the Suez Canal. It is of more value to England on this second than the source of the sugar industry of Kan-san and it has been demonstrated beaccount than any other; anything that tends toward India or is remotely connected by trade, sympathy or the chain of commercial continuity with it, is looked upon by the British government, if not in its possession, with a jealous, sometimes with a longing, eye; in either case a movement as silent and it may be as slow, but generally as irresistible, as that of the glacier is inaugurated and before other powers know exactly what is meant or being done the bolt has fallen, the flag of the mighty empire floats in triumph over another section of foreign territory.

Suskin contains usually from 5,000 to 10,000 inhabitants, most of i nomadic and therefore indefinite. At this time there is perhaps more certainty as to its numerical status than for a long time past, if not altogether. The investors of the place comprise the population, and their numbers are easily ascertained.

One dark cloud that appears before the civilized world because of the capture is the effect it may have upon the fate of Stanley. It is understood that Osman Digna offered, some days ago, to release the explorer as the price of British withdrawal from Suakin.
